

# Ask science? Part 1

Things to ponder.

**First**, some say, “*Science has explained everything.*”

But science hasn't explained the Creator. Nor can it tell us how the universe originated, or how life began. Science, on its own, cannot even decide what is ethical and what isn't.

**Second**, some say “*science does away with our need of God.*”

The Biblical God, however, is a God of the whole show - the bits we do understand (through science) and the bits we don't.

**Third**, some say “*faith is unscientific - belief without evidence.*”

But Christians have solid evidence from “those who from the beginning were eye-witnesses”

Luke 1.2. “That which we have seen and heard we declare to you.” 1 John 1.3.

**Fourth**, some say, “*by chance life sprang from non-life.*”

What a miracle! *Chance* has no substance, no physical or material being, no energy, no vitality. Can such a non-existent entity - in other words, *nothing* - produce life?

Well, thanks to Louis Pasteur's award-winning experiment, science has proved conclusively that life does not arise from non-living matter.

Finally, look at our world and its inhabitants - so perfect that no improved models are needed. God's knowledge and skill was total and complete at the time of his marvellous Creation.
