

God's foreknowledge

For all to see!

Because God put his foreknowledge on record, the following information has been in print for thousands of years!

First, *the role of the atom.* Only in recent times have we discovered that everything we see is composed of invisible atoms. Yet two thousand years ago the Bible recorded that “the things which are seen were not made of things which are visible.” Hebrews 11.3.

Second, *snow's hidden treasures.* Thousands of years ago Job was asked, “Have you entered into the treasures of the snow?” Job 38.22. What did this mean?

Only now (through the microscope) we've learnt that *every single snow crystal* is unique – each one with its own beautiful six-sided pattern! No two snow crystals are the same! What a miracle!

Third, *the divisibility of light.* Before anyone knew that light could be “carved up”, Job was asked, “By what way is light separated?” Job 38.24.

Not till Sir Isaac Newton's experiments in the 1600s was it revealed to us that light can be separated into seven colours.

Through these insights into God's prevision, we are encouraged to have full confidence in everything else that he reveals to us in his Book.
