

As to medical science.

An ancient surprise

What is the basis of modern sanitary science? It is precisely the health laws laid down by Moses *thousands of years ago!* See the Bible's book of Leviticus on quarantine, cleanliness, sterilisation.

“Moses was learned in all the wisdom of the Egyptians” Acts 7.22. Although Moses grew up in Pharaoh’s palace in Egypt, he was able to filter out the superstition in their teaching.

First, what Moses wrote 3,500 years ago in the first five books of the Bible has never needed revision. Why not? Because what he wrote came from God.

Second, where did Moses’s insights on hygiene come from? They came from God. “Moses came and told the people all the words of the Lord . . . and Moses wrote all the words of the Lord.” Exodus 24.3-4.

Third, famous London surgeon, Sir James Cantile, was able to say of these health regulations recorded by Moses, “We have never yet upset one of Moses' laws in regard to hygiene, sanitation, or medical teaching.”¹

Science took thousands of years to catch up with Moses. We can have confidence in the precision and reliability of God's Word.

The Bible speaks as accurately about earthly things as it does about heavenly.
